

Instructions for the Frankenstein Family

Manipulated Photo Brooke Bush

Hair:

I used picmonkey.com (below) to edit my photos. I started out by doing there hair. I used there cloning icon (to the right) and also there highlight icon (to the right)

Mothers Hair: I used her hair for a source and dragged it above her head. I also used the highlight icon to darken her hair except for one strip which i highlighted just like frankensteins bride (to the right).

Husbands Hair: I used the sons hair as a source and smoothed it out in the shape of a square just like frankenstein himself.

Boys Hair: I sourced the dark part of his hair to shape the v on his head and also to smooth out the top to make it look like Dracula's hair.

Daughters Hair: I cloned her hair and the background behind her to make it seem as if she never had a bow. I also used the highlight icon to change her hair color to both black and a white streak to have an old feeling.

Face

For the faces I used the new edition they have. Its themes (to the right) this includes a variety of themes such as witches vampire etc. that can create a scary character of your choice.

Themes

Before Tooth Decay

After Tooth Decay

Fathers Face: I used under witches theme, coven complexion to make his face green which i faded to make it more realistic. For his eyes i chose under zombie, corpse eye which i chose the brown eye and i sized it were it looked like his real eye. Since his teeth were to white i used under witch, tooth decay and i highlighted his teeth and it made it look as if he has gross teeth

Mothers Face: I used under zombies the icon zombulate which is where it makes your skin look old and gross with a single drag. I also used under Vampires , fangs which is where i dragged 2 fangs to her mouth and faded it to her color of her teeth and last but not least under witches i used hag eyes and i dragged the pair of eyes to fit were it looked as if it was her real eye.

Sons Face:For the sons face I used lip tint to put a dark lipstick instead of his light pink lips. I also used both corpse eye and coven complexion just like the dad to look like he inherited it from him.

Girls Face: for the girls eyes I used under witches, hag eyes to look as if she inherited it from her mother. I also used gashes and slashes under zombies to make it look as if she has a flap of skin. I also used zombulate under zombies and dragged it over the “flap” of skin to make it look dead. To make it look as if she hasn't got sleep I used under zombies Zombie bruise and highlighted her eye fading it to look more realistic. i used Last but not least i put fangs on her to make it also look as if she inherited it from her mother.

Background

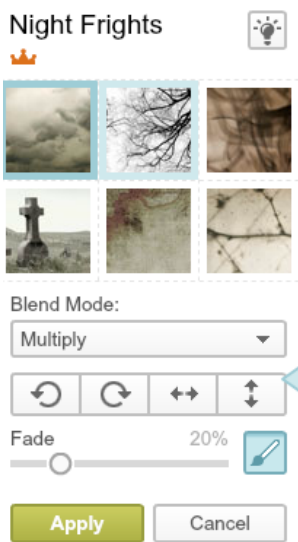

For the background to eliminate the jolly leaves I used under vampires night fright which selected the graveyard background and highlighted the parts i did not want to have a grave yard (kind of like an eraser of the effect)
